

# Data 551 Visualisation Poster Presentation

What are the different income groups per region?

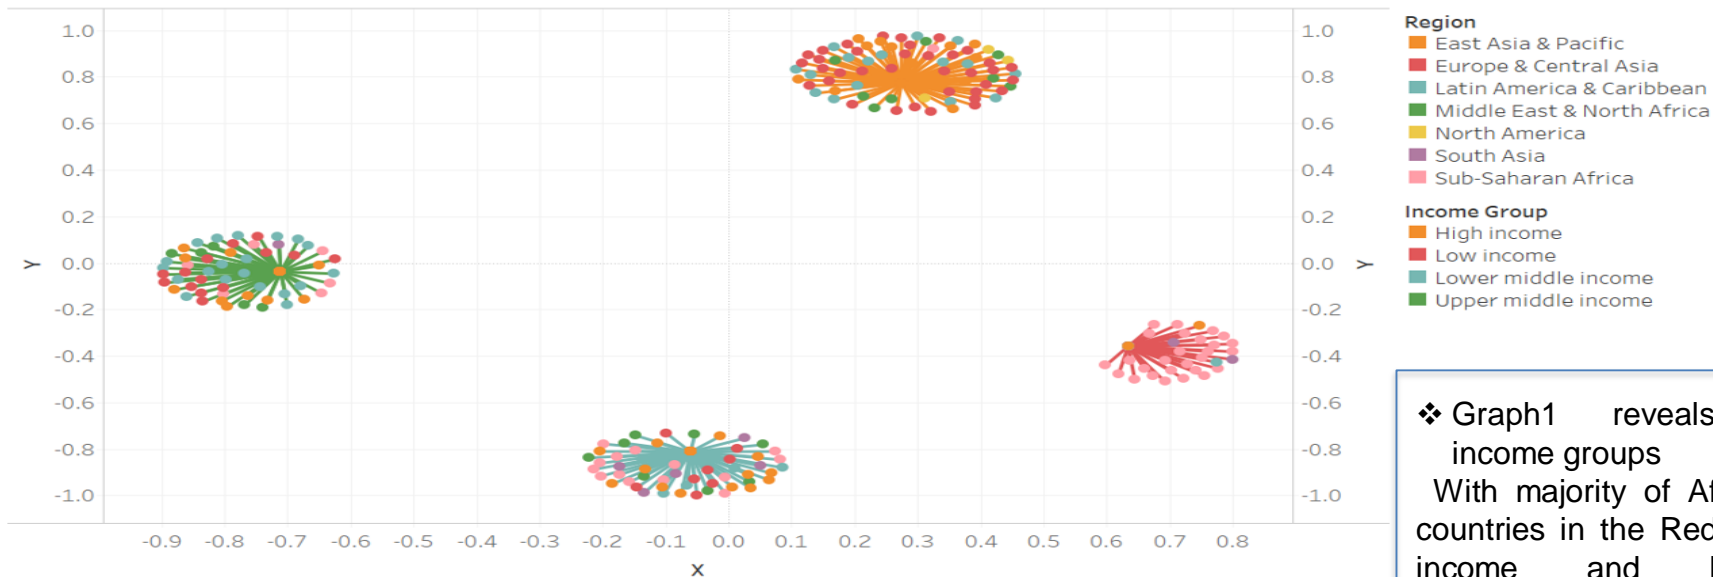

❖ Both graphs answer same question however with different emphasis. Above it clearly shows the regions and income groups and the second graph shows regions and income and highlights the great discrepancies: Majority of African countries all in red-Low income.

What are the different Income Groups per region

❖ Graph1 reveals 4 income groups  
With majority of African countries in the Red-Low income and North America predominantly in the Green-High Income

What is the evolution of GDP over time for different regions?

❖ Graph2 shows evolution of GDP over time and clearly shows two groups and trends. The Americas, Asia and Europe in a steeper upward trend. Africa pretty much flat lining.

The trend of average of GDP for Year Year. Color shows details about Region.
